Projects

News Express Web Application github- NewsExpress
A dynamic web application utilizing the News API to deliver real-time-news updates.
It contains various domains of news, which can be selected through the navbar
link items. Developed with ReactJS, offering seamless navigation through various
news domains.
Users can choose from the category available in the navbar such as science, business etc.

PvTender PvTender Deployement
Crafted during a collaborative effort at a Hackathon in Jaipur, PvTender streamlines the tender bidding process for
private entities. Facilitates direct bidding by individuals, eliminating the need for intermediaries and fostering
transparent tendering.
Designed to enhance efficiency and fairness in the private tendering ecosystem.

GoFood: github- Gofood
A MERN (MongoDB, Express.js, React, Node.js) application catering to food
enthusiasts. Incorporates user authentication with login/signup functionalities.
Offers a user-friendly interface including features like product listing, cart management, and an admin panel for product
management. Utilizes React Bootstrap for responsive design and MongoDB for efficient data storage.

E-Commerce Site: github- E-commerce
An interactive online shopping platform built from scratch using HTML, CSS, and
JavaScript. Features diverse pages such as product displays, shopping carts, about
sections, and contact pages. Seamlessly integrates user experience with smooth navigation
and intuitive design elements.
